

CELDT Reporting Cycle

The test reporting cycle determines which CELDT administrations will be aggregated and reported. The CELDT is unique in that there are two types of administrations: annual assessment (AA) that are given July 1st through October 31st and initial identifications (II) that are given year round. Data are aggregated across these two types of administration for reporting and posting purposes. The CELDT reporting cycle will be converted to a fiscal year cycle. The following table depicts the reporting cycle timeline for years 2001/02 through 2003/04.

Reporting Cycle Timeline

	Initial Identification Reporting Schedule	Annual Assessment Reporting Schedule
